Pyrusium Switcher

For practices that can access multiple instances of EMIS via the switcher, there is a corresponding Pyrusium Switcher.

1. Go to: Start > All Programs > Black Pear Software > Pyrusium switcher

- CDB SWITCH Choose or enter the EMIS CDB number
- If the Pyrusium switcher has been used before, the previously used values will display in the drop down box. If the EMIS org code is missing, just type it directly into the box:

2. Pyrusium switcher will open as follows:

🍐 PYRI	JSIUM SWITCHER	×
CDB		\sum
	29390	
Choose or	29393 Enter the clinic coorname	

4. Click the **Switch** button:

٢	PYR	PYRUSIUM SWITCHER			
CD	в	29390		•]
			SWITCH		
Pres	is swite fiqurat	ch to update ion	the Pyrusium		

5. The status message will change confirming that the config has been switched. Ensure that Pyrusium is restarted to pick up the new settings.

Ó	PYRUSIUM SWITCHER ×				
CDB		29390	•		
SWITCH					
Switched! Restart Pyrusium for new configuration to take effect
